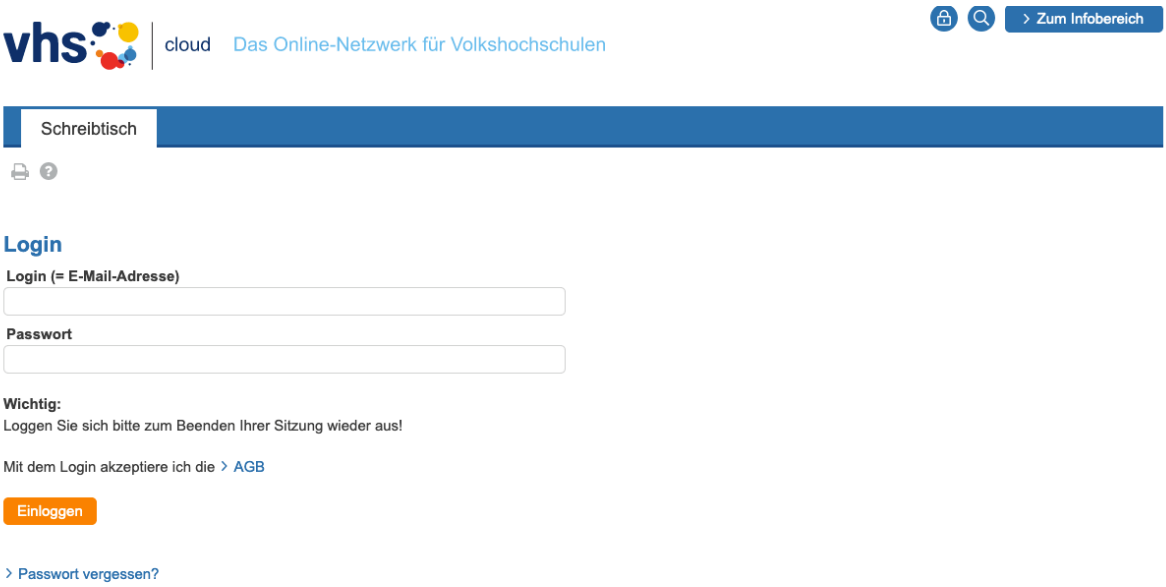
How to participate in the webinar (conference)

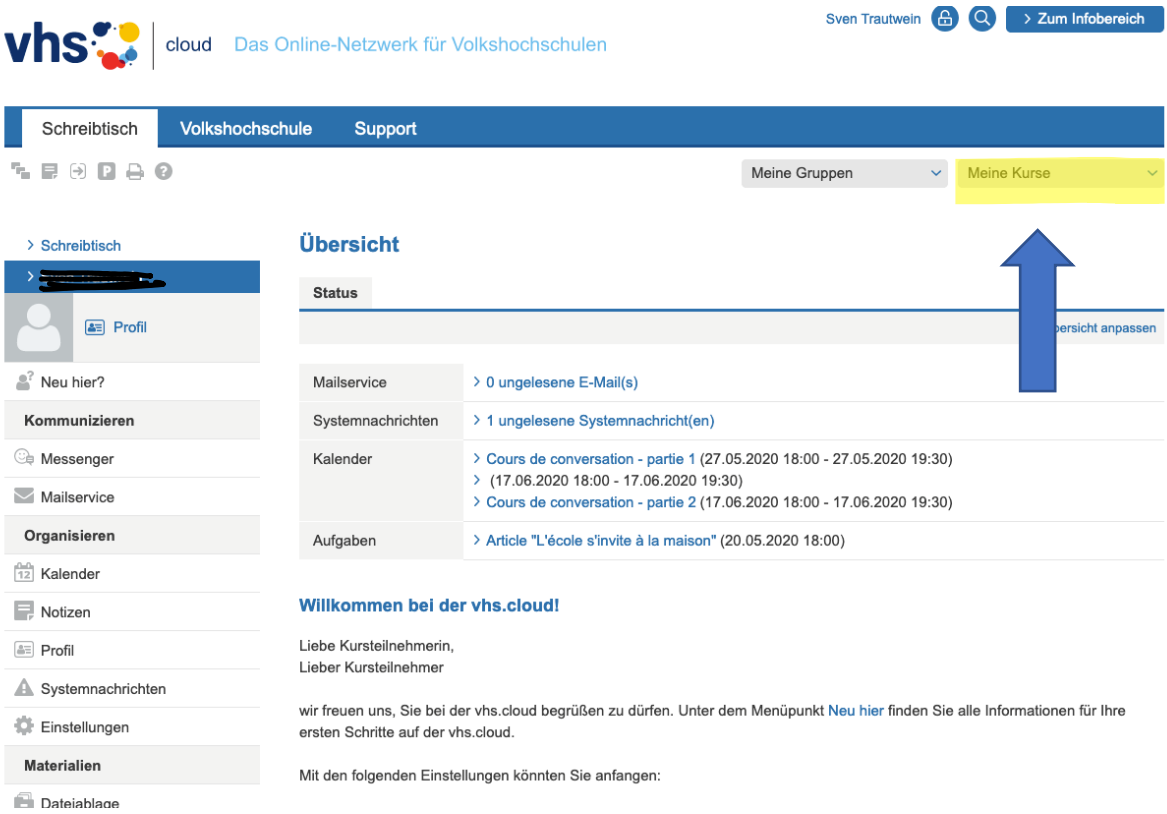
To participate in the webinar (conference) we generally recommend using Google Chrome as your browser.

Log in to the vhs.cloud. Click on “Zur Cloud” (to the cloud).

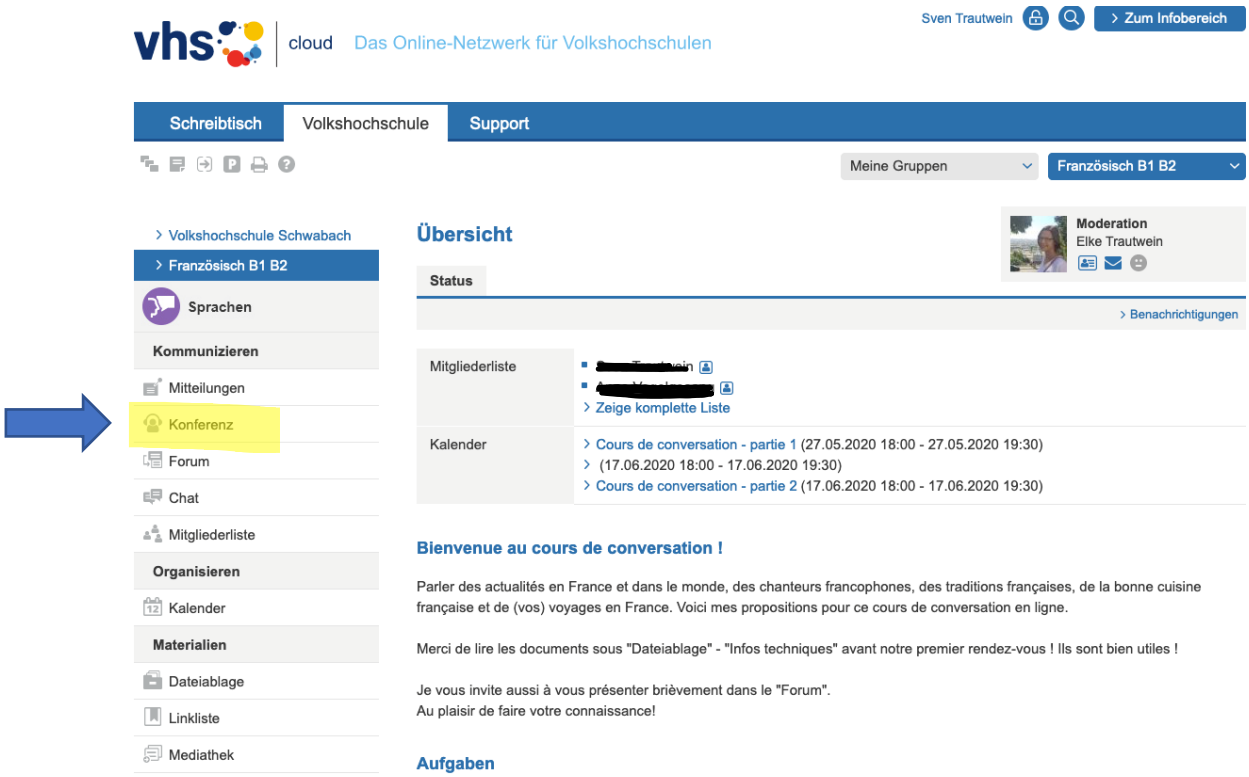
Enter your login (= e-mail address) and your password.



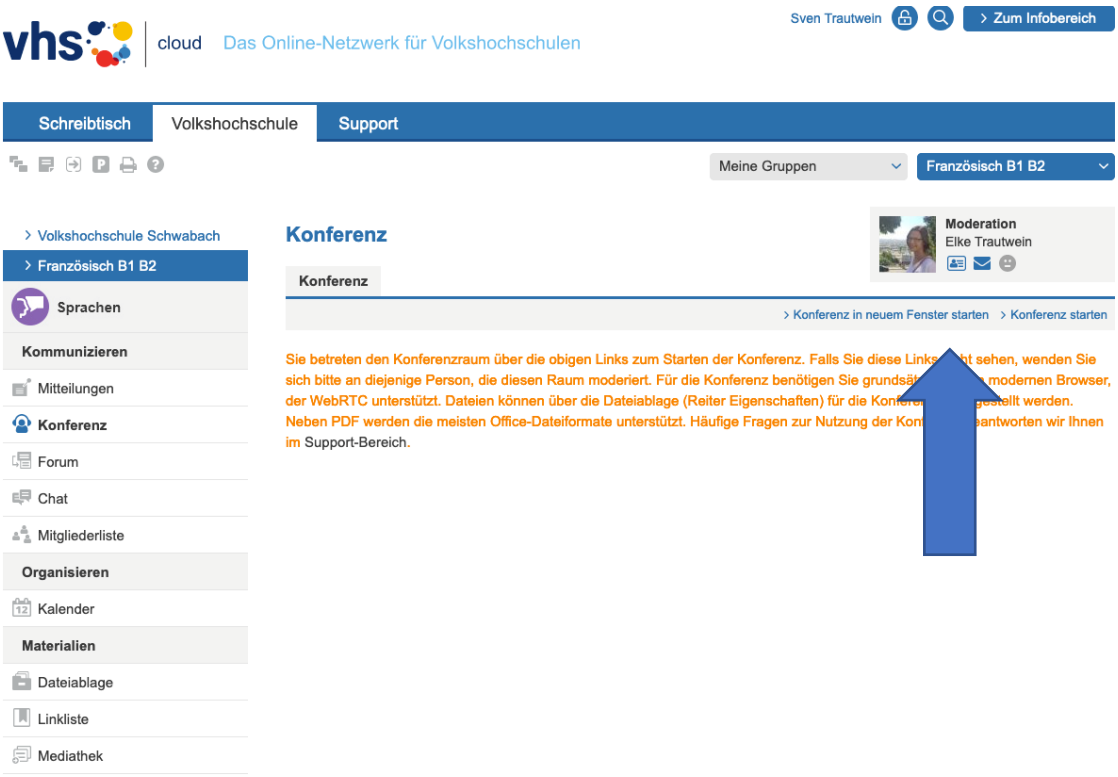
Under “Meine Kurse” (my courses) select your course for which the video conference will start.



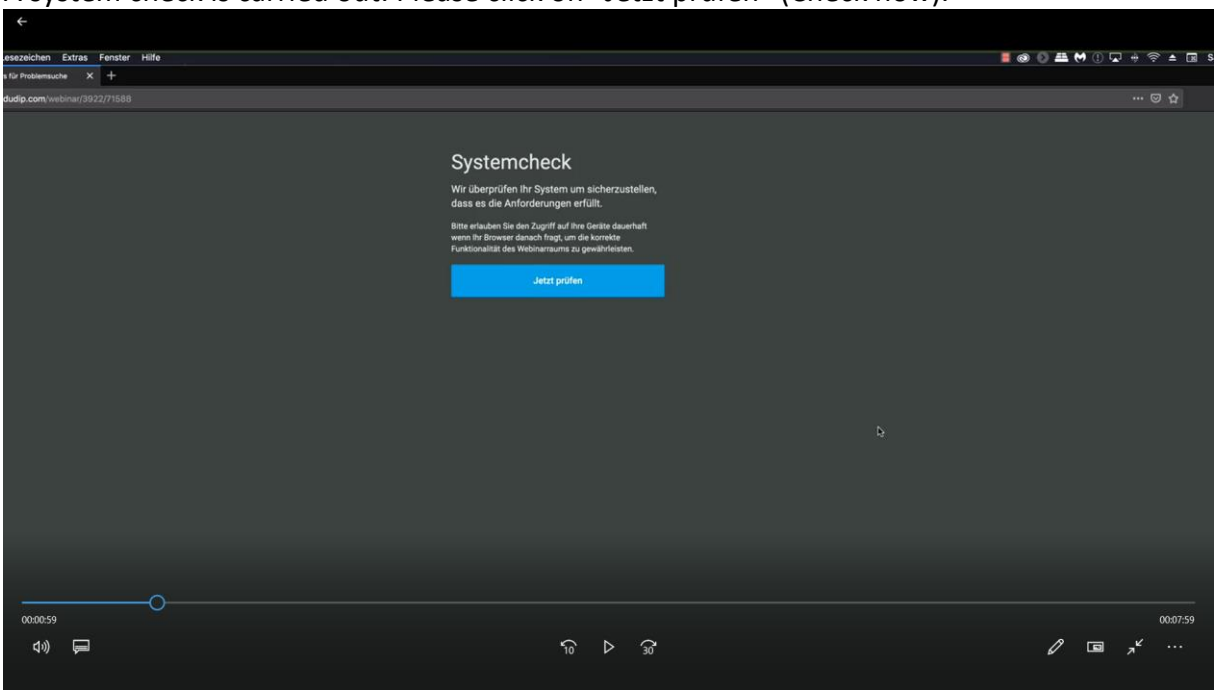
Click on “Konferenz” (conference) in the left-hand menu.



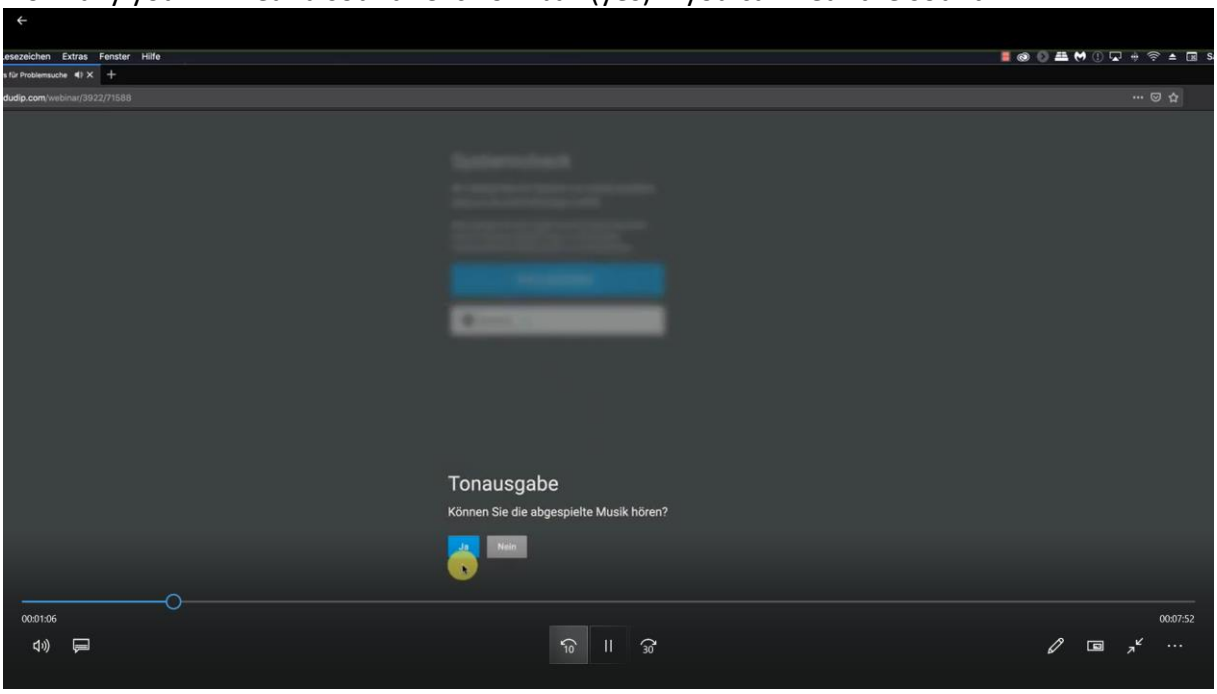
Then click on “Konferenz in neuem Fenster starten” (Start conference in a new window).



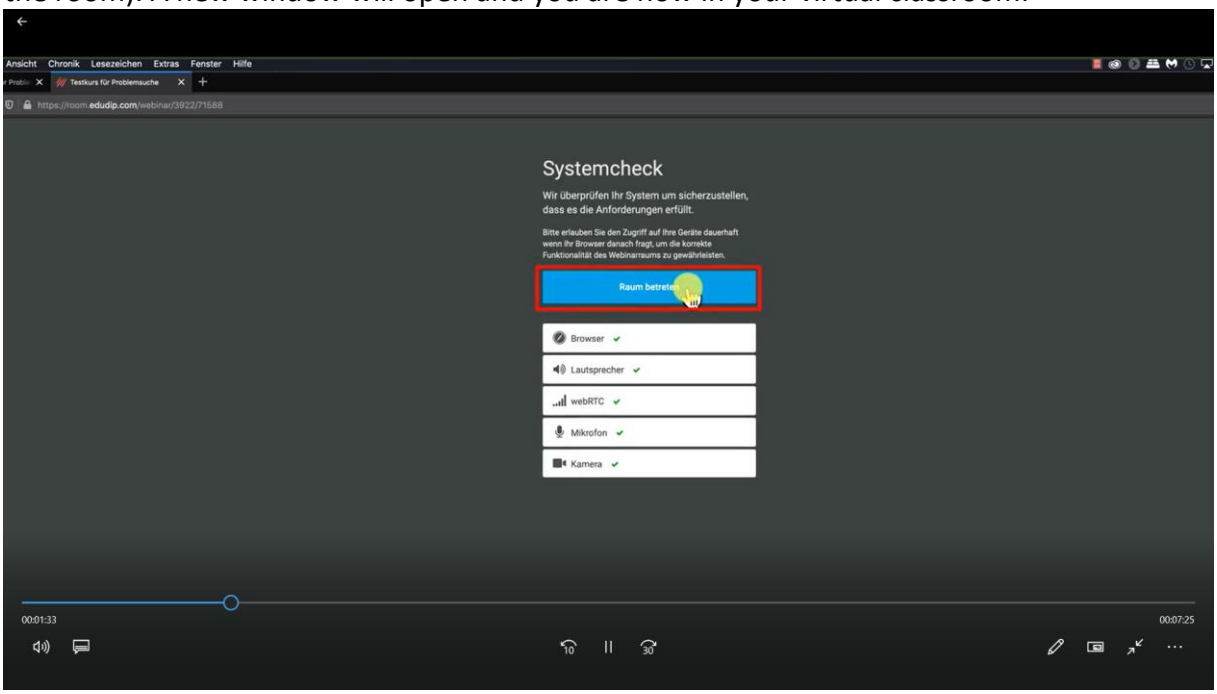
A system check is carried out. Please click on “Jetzt prüfen” (Check now).



Normally you will hear a sound. Click on “Ja” (yes) if you can hear the sound.

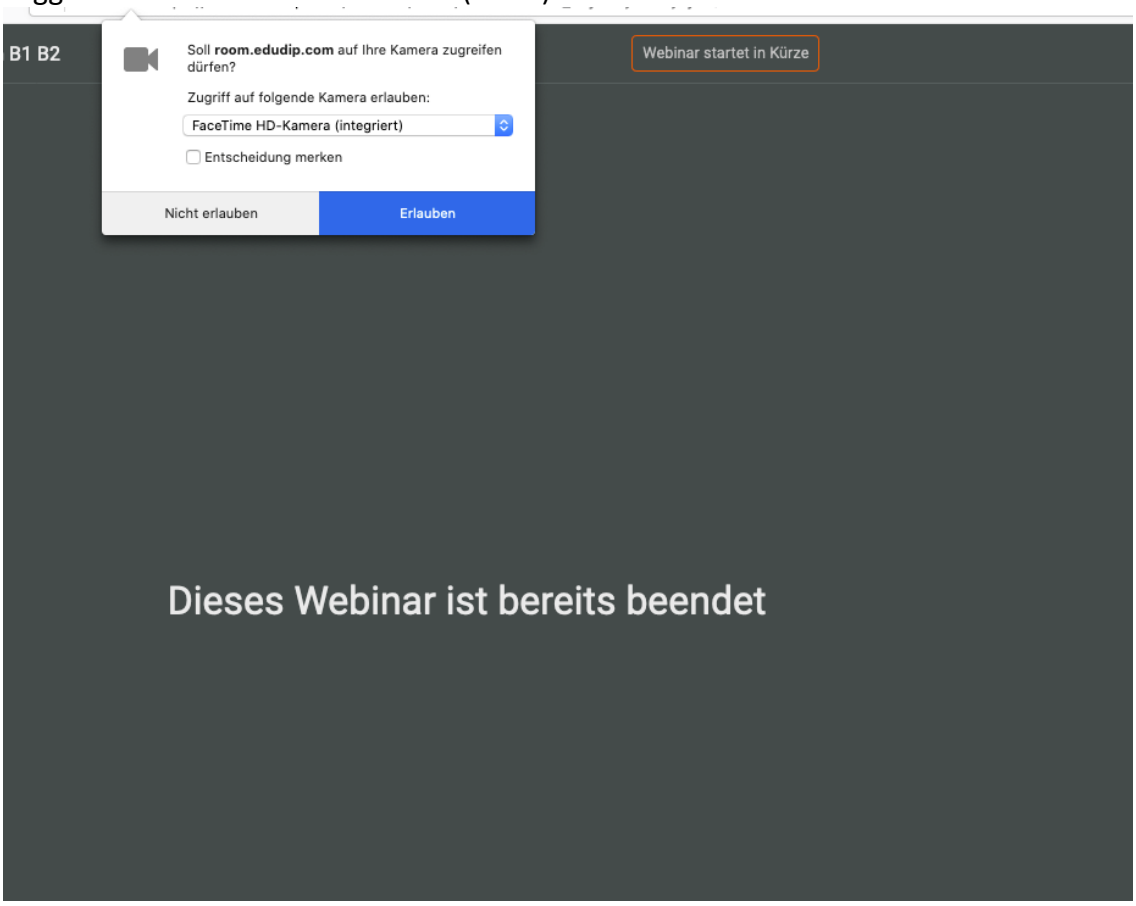


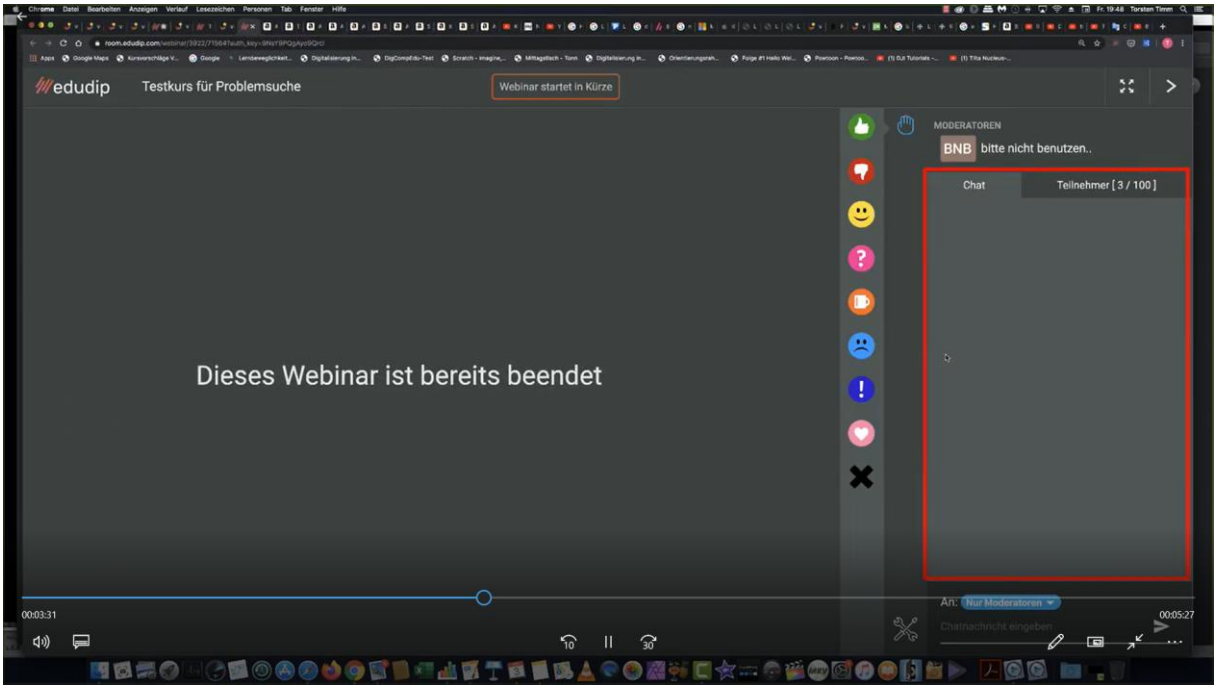
After your system check has been successfully completed, click on “Raum betreten” (enter the room). A new window will open and you are now in your virtual classroom.



As soon as the moderator has enabled you as an “active participant”, a message will appear asking whether you want to enable your microphone and camera.

The system suggests a camera or a microphone from your system. Please check the suggestion and click on “Erlauben” (allow).





If you have any problems unlocking the camera / microphone, you can inform the teacher via the chat.
